(MacOS virsion RC-808.app )

When Safari downloads a .zip file, Safari may not decompress it definitely. Therefore as RC-808.app may not work definitely, in the following procedures, please download it.

## 1. Configuration

At first, please download "The Archiver" (free decompression software) from App Store.

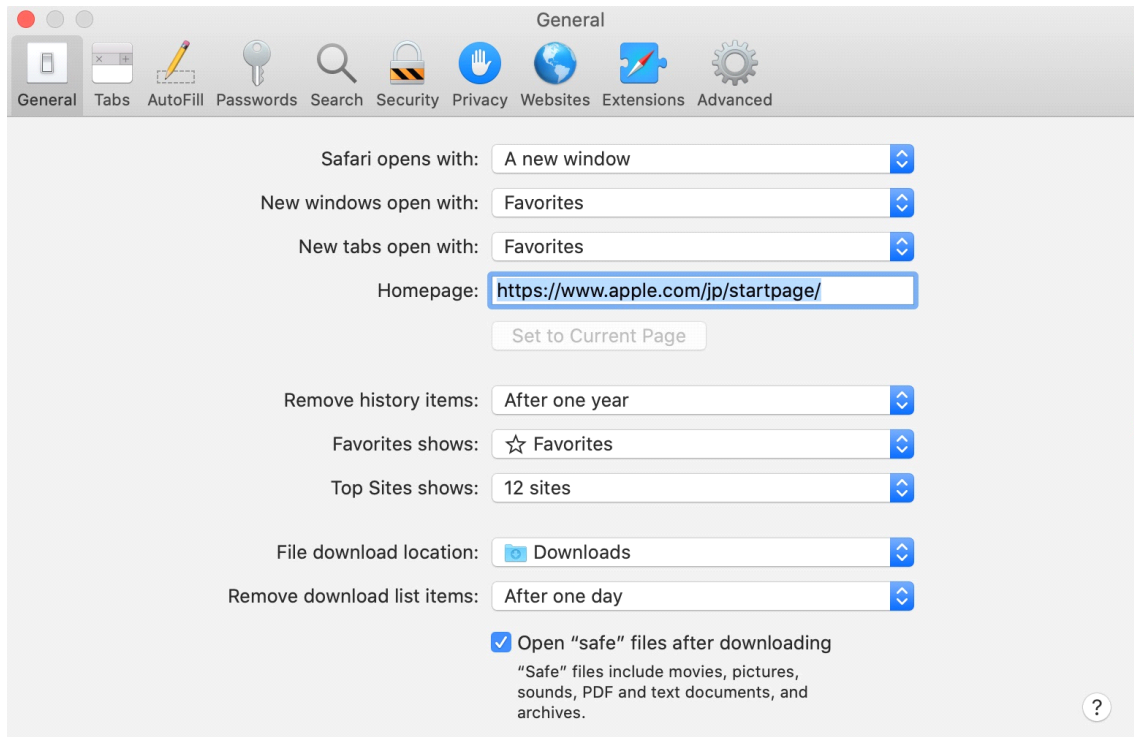

When you download a .zip file in Safari on your Mac, it will be decompressed automatically.

## 2. Preparation

Open Safari.

From the Safari menu, select Preferences.

Find the check box of "I open the safe file after the downloading".

Uncheck the check box to prevent .zip files from opening automatically.

※If this work is over, you may return this setting.

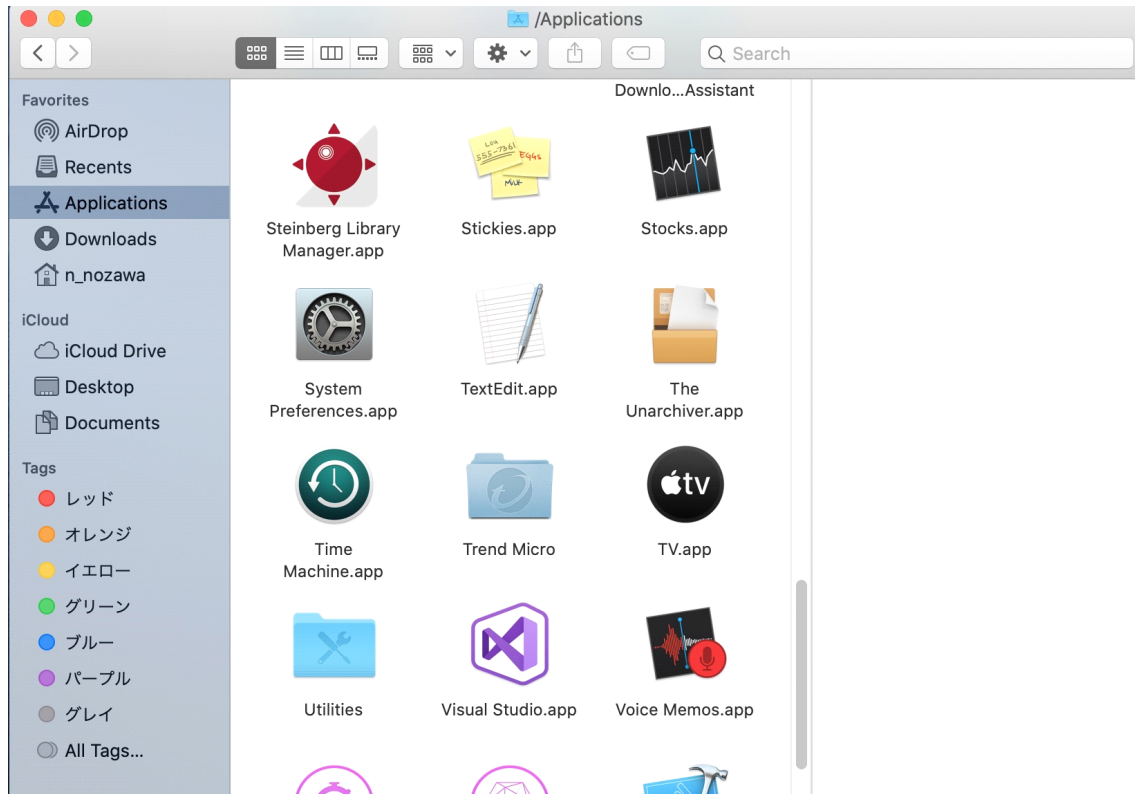

## 3. Download

Open the downloading page of <https://rc-808.com> and click "Mac Version" button and download ReCreate-Mac.zip.

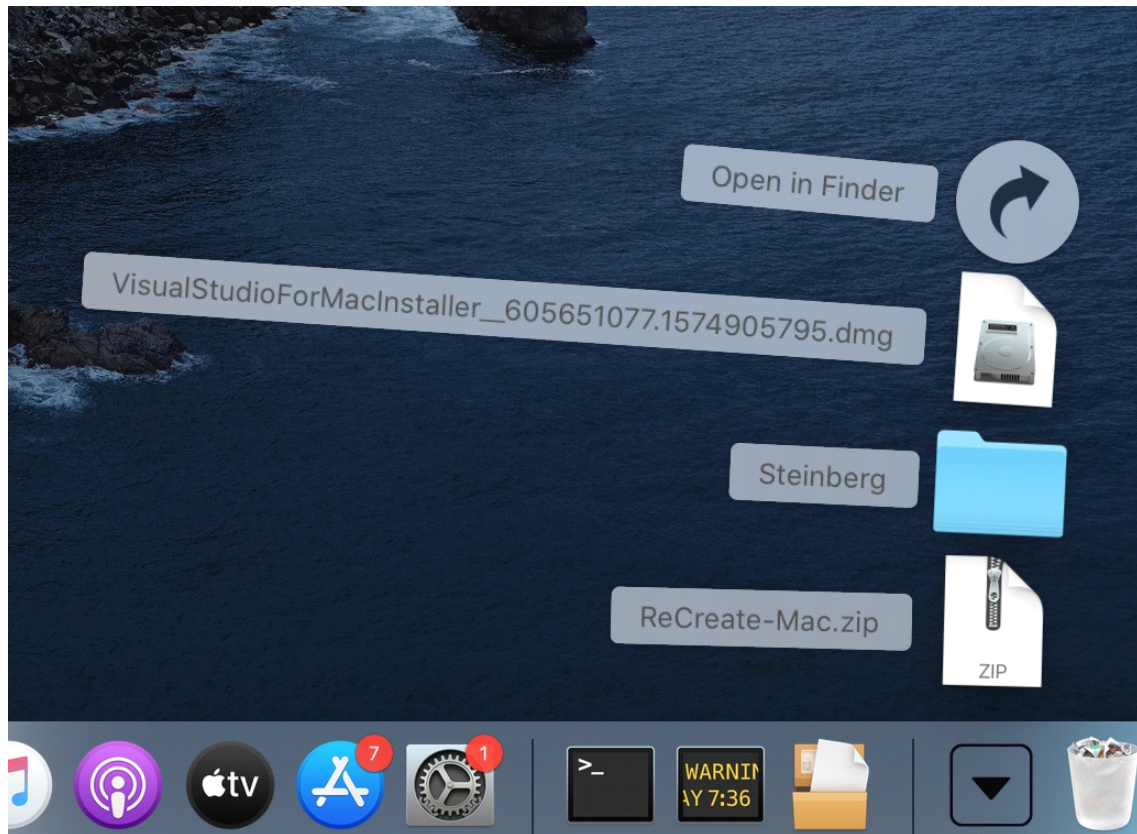

## 4. decompression

Start Finder.

Open the application folder and display an icon of "The Unarchiver".

Drag & drop to an icon of "The Unarchiver" from the downloading icon of the dock of Mac in search of ReCreate-Mac.zip

ReCreate-Mac folder is made in a downloading folder.  
Move this in any place on Macintosh HD, and use it.
